Re: 161 E. Grand Building, Results of Argonne Analysis

Joe
Dear Mr. Madonia:

I have enclosed the results of Argonne's analysis of the drums removed from 161 E. Grand that contained radioactive material removed from the 161 E. Grand building. After Argonne completed this analysis, Kerr-McGee removed the drums from Argonne for disposal at Envirocare in Utah.

As you know, we are still awaiting your client's final report on the removals that took place at this building Thanksgiving weekend 2003 and Christmas weekend 2003. We look forward to receiving those reports. Thank you for your continued assistance in this matter.

Sincerely,

Mary
Mary L. Fulghum
Associate Regional Counsel
